

Agrial Fresh Produce Ltd Gender Pay reporting

We are an employer required by law to carry out Gender Pay Reporting under the Equality Act 2010 (Gender Pay Gap Information) Regulations 2017. The information below is based on the requirement date of 5th April 2025.

Pay Information

Mean hourly pay difference between male and female employees	11.6%
Median hourly pay difference between male and female employees	7.6%

Gender split – pay quartiles

Gender split	Lower Quartile	Low Mid Quartile	Upper Mid Quartile	Upper Quartile	Total
Male	49.4%	54.2%	67.0%	76.4%	61.8%
Female	50.6%	45.8%	33.0%	23.6%	38.2%

Bonus information

Mean bonus difference between male and female employees	-4.6%
Median bonus difference between male and female employees	0%
Percentage of men who were paid bonus pay within a 12 month period	70.2%
Percentage of women who were paid bonus pay within a 12 month period	75.9%

What have we done so far

The Company has a job evaluation programme across all sites to enable us to assess the value of each role in the business. These roles have then been pay benchmarked and this data used when promoting, recruiting and at annual pay review time.

We have flexible working options to enable work life balance to help retain employees.

Our overall median gender pay gap is 7.6%

Agrial Fresh Produce Ltd's gender pay gap is lower than the last published median National Average of 13.1%. It has reduced from 8.2% in 2024.

The factory team are paid the same rate according to which job they do. There is no difference between the rates paid to men and women. Night workers receive an uplift on the day rate. As the night teams are predominantly male this contributes towards the hourly pay difference.

The pay quartiles on the left show the proportion of male and female employees in each of the quartile pay bands. At entry level the split between male and female is fairly even. At a senior level there is a higher representation of males versus females. As a business we continue to ensure both male and females have equal access to senior roles, with flexible options being considered where possible to retain women in the workplace. We have seen a 2% increase of women in the upper quartile this reporting period.

Bonuses based on Key Performance Indicators are available to the majority of employees. The mean bonus difference has changed from 9.8% last year to -4.6%. This is due to a change in the bonus scheme which has seen some employee groups no longer participating in the bonus scheme. These have been male dominated functions.

What we are doing next

We will continue to actively look at ways to address the gender split throughout the business.

As a Company we want to employ the best person for the job and pay competitive rates to attract talent.

I confirm the information published above is accurate.
